

## BOX FRAME PORTRAIT

Materials: Box frame, various photograph portraits, white cardboard, butterfly template, pencil and scissors.

Trace outline of butterfly on to cardboard and use this as template. On the back of the portraits (black and white photographs work well) trace butterfly shape again, and cut out. Try to get details of eyes on one or other of the wings. Fold photograph on each side of the butterfly's body and place double sided sticky tape on the back. Arrange on backing cardboard (cut to size of box frame), and once happy with arrangement, stick down. Place portraits into frame.
